SKILLS

Next.js | React.js | JavaScript/TypeScript | React Redux | React Router | Framer Motion | CSS | TailwindCSS | Material UI | HTML | Python | Responsive Designing | Problem Solving | API Integration | Vite | Cursor | Claude Code | Git

PROJECTS

Kormedic | React | Material UI | CSS | Framer Motion | React Router | React Hook Form | Vite

Commercial website project for a physiotherapy clinic, used by a real company called Kormedic at [kormedic.pl](#)

- Working contact form using **Email.js** to send messages to the clinic's business account, with message validation via **React Hook Forms** and message status notifications via **React Hot Toast**
- Fully **responsive** design
- UI animations created with **Framer Motion**
- Design based on **Material UI** component library

Skyline Weather | Next.js | TailwindCSS | TypeScript

A web application displaying current weather for a given location, allowing users to check the forecast anywhere using built-in search

- Real-time weather data provided by the **openWeather API**
- Server-side API integration using the **App Router** mechanism
- Fully **responsive** design

Crypto Forge | Next.js | Material UI | TailwindCSS | Framer Motion | Three.js

A cryptocurrency exchange website displaying live crypto prices, using the Next.js environment for server-side requests and lazy loading of a 3D model

- Live cryptocurrency prices
- Fully **responsive** design
- 3D model lazy loading using **next/dynamic**
- Server-side API integration using the **App Router** mechanism
- UI animations created with **Framer Motion**
- Use of **Material UI** component library elements
