EXPERIENCE

Kormedic

Commercial website for a physiotherapy clinic, live in production at kormedic.pl

- Used **JavaScript** and **React** with **Material UI** to build a user-friendly frontend.
- Improved booking conversion by handling contact form with **EmailJS** and client-side validation.
- Developed smooth UI transitions utilizing **Framer Motion**.

Projects

Library Management System

Full-stack library management platform.

- Used **ASP.NET** and **C#** to develop the backend layer with **JWT** authorization and **CRUD** operations.
- Implemented recommendation logic on the backend based on users' borrowing history.
- Developed unit tests using **Jest** (frontend) and **xUnit** (backend) to verify UI behavior and recommendation logic correctness.
- Used **Entity Framework** to design a relational **PostgreSQL** database.
- Containerized the frontend, backend and database using **Docker Compose**.
- Used **TypeScript** and **React** with **Material UI** and **Tailwind CSS** to build a user-friendly frontend.
- Used **React Redux** to manage application state.

Travel Planner

Console application for travel planning.

- Developed recommendation logic in **C#** based on user preferences and data from external APIs.
- Used SQLite to store users' travel plans.
- Tested recommendation logic using **xUnit**.

SKILLS

BACKEND & DB: C#, .NET (ASP.NET Core), Entity Framework, SQL, Python

TOOLS: xUnit, Docker, Git, Vite, Jest, ESLint, API Integration, Linux

FRONTEND: Next.js, React.js, JavaScript/TypeScript, React Redux, React Router, Framer Motion, Tailwind CSS, CSS, Material UI

EDUCATION

University of Agriculture in Krakow — Weekend studies, available for full-time work weekdays
Mechatronics Engineering, B.Eng. | 10.2026 – early 2030 (expected)
