SKILLS

Next.js | React.js | JavaScript | CSS | TailwindCSS | HTML5 | Python | Django | C | PostgreSQL | Framer Motion | Git | Gemini CLI | Material UI | Responsive Designing | React Hooks | Node.js | Problem Solving | API integration | Vite

EXPERIENCE

CoinForge | Next.js | Material UI | TailwindCSS | Framer Motion

CoinForge is a modern web application for tracking real-time cryptocurrency prices with a clean, data-driven interface.

- Live cryptocurrency price tracking with real-time updates powered by **server-side rendering (SSR/SSG)** for fast load times and SEO optimization
- Consistent, professional UI built with a **Material Design component system** for an intuitive and polished experience
- Fully responsive layout with **utility-first styling** for precise, flexible design across all screen sizes
- Smooth **animations and micro-interactions** elevating the user experience on every interaction

MedicalWebsite | Material UI | Framer Motion | React | React Router | React Hook Form | EmailJS

Kormedic is a professional commercial website for a real physiotherapy clinic, designed to build trust and make it easy for patients to find information and get in touch.

- **React** as the foundation for organized, component-based architecture enabling clean code structure and seamless integration of all libraries
- Fully responsive, accessible layout with a professional **Material Design component system** ensuring a clean and trustworthy medical aesthetic
- Smooth animations built with **Framer Motion**, enhancing the overall professionalism of the clinic's online presence
- Contact forms with advanced validation and error handling powered by **React Hook Form** and **EmailJS** enabling seamless patient inquiry experience

Feynman Bot | Node.js | Gemini API | Discord.js |

is a Discord bot designed to enhance learning through the Richard Feynman technique — explaining concepts in a simple way

- **Node.js** as the runtime environment, enabling efficient server-side execution and smooth performance across all bot operations
- **Gemini AI** powering intelligent answer evaluation — analyzing user explanations and providing meaningful feedback based on the Feynman learning method
- **Discord.js** enabling smooth command handling and real-time communication within Discord servers.

Education

I Liceum Ogólnokształcące Dębica
